Understanding by Design (UbD) Framework

Many Savvas programs, including Envision Math Algebra 1, are often structured around the principles of Understanding by Design. This framework focuses on identifying desired results (what students should know and be able to do) at the outset, then designing assessments that reveal whether those results have been achieved, and finally planning learning experiences and instruction that will lead to achievement of the desired results. This backward design approach ensures that learning objectives are clearly defined and instruction is purposeful.

Inquiry-Based Learning

The curriculum often encourages students to ask questions, investigate mathematical phenomena, and discover patterns and relationships. This is typically facilitated through hands-on activities, guided discovery exercises, and problem-solving tasks that require students to think critically and make connections. The goal is to move beyond memorizing formulas

to understanding the underlying mathematical logic.

Differentiated Instruction

Recognizing that students learn at different paces and in different ways, Envision Math Algebra 1 provides tools and strategies for differentiation. This might include tiered assignments, flexible grouping, varied levels of support in online activities, and opportunities for enrichment for advanced learners. Respecting copyright ensures sustainable access to quality content for everyone.

Combining multiple formats—such as PDF, ePub, and audiobook—offers the most balanced learning experience. PDFs preserve layout and structure, ePub files provide adaptable text and accessibility features, and audiobooks support auditory learning and hands-free consumption.
